THE ONLY 2020 OFFLINE MEETING OF THE PROFESSIONALS WHO DEFINE THE PRESENT AND FUTURE OF THE WATER INDUSTRY

The international water show – 14th International Exhibition «Water: Ecology and Technology» EcwaTech took place at Crocus Expo in Moscow, Russia.

The industry's key manufacturers and service providers after a long break could personally present modern technologies and solutions for municipal and industrial water supply, water treatment, sewage treatment, water disposal, sludge management, as well as for the construction and operation of pipeline systems.

Since 1994 «Water Ecology and Technology» forum **EcwaTech** has become the most convenient business platform of the sector as well as the most significant and popular tool for information and new technologies exchange, elaboration of joint solutions and search of new partners. **EcwaTech** with more than twenty-year successful history, is the key networking platform in Russia dedicated to the utility and industrial water supply, wastewater treatment, pipeline system

construction and operation gives specialists an opportunity to discuss current issues related to the water sector, and the companies – to showcase new developments, products and services.

As usual, the water/wastewater issues only will not limit EcwaTech - there are other expositions under EcwaTech umbrella:

- **CityPipe** «Piping systems for municipal infrastructure: construction, diagnostics, repair and operation»
- **NO-DIG Moscow** - Installation and repair of underground utilities using trenchless technologies
- **BW Show** «Water bottling and bottled waters».

This year, EcwaTech was co-located with the WasteTech - International exhibition for Waste Management, Environmental Technologies and Renewable Energy.

UNITED ECWATECH AND WASTETECH KEY FIGURES FOR 2020:

- **285** exhibitors
- Innovation, technologies and equipment from **45** international companies from
- **15** countries:
Austria, China, Finland, France, Germany, Hungary, Israel, Italy, Kazakhstan, Poland, Russia, Switzerland, the Netherlands, Turkey, USA
- **2** national pavilions (Germany, Italy);
- **67** (about **25%**) first-time exhibitors;
- **5607** visitors;
- **11** conference program events;

ECWATECH FEATURES AND NOVELTIES

EcwaTech distinguishes not only the scale, but also the learning with the innovations of water industry. The exhibition always presents the latest innovations of the industry, and leading experts are ready to share effective solutions to topical issues of the sector.

With the presentation of new developments of the engineering and technological center "**Mosvodokanal**" the first day of the forum was opened. The company presented new projects for modernization and automation of water treatment utilities.

Voronezh Aqua - one of the leaders in Russia in the implementation of integrated solutions in the field of water treatment and water purification of industrial and civil facilities presented an interactive model of large-scale integrated treatment facilities of an energy facility.

RDE Group offered a full range of services for the selection, installation, adjustment, commissioning and maintenance of equipment, presented at its booth unique solutions for the modernization and reconstruction of water supply and sewerage systems.

Polyplastic Group presented the latest developments of the company: pipes of the MULTAPIPE RC and PROTECT RC series, characterized by high resistance to cracking under point loads. These pipes can be laid directly on a leveled base, used for trenchless laying and reconstruction methods, including pre-swaged pipes. Pipes of the PROTEKT Detect series, allowing determining the location of the pipeline, including in places with a large number of communications. Pipes of the PE 112 series, made of innovative pipe polyethylene, characterized by a minimum long-term strength MRS of 11.2 MPa.

CONFERENCE PROGRAM

An extensive conference program is a «feature» of EcwaTech. It covers a wide range of issues including institutional issues related to water and sewage system; water resource protection and management; water quality and public health; reliability and safety of water supply and wastewater treatment; pipeline construction and repair.

This year Conference program was divided to 5 sessions:

Session 1. Transition to the best available technologies and obtaining of the integrated environmental permits

Session 2. New approaches to water supply system management. Equipment and materials for water treatment

Session 3. Sewage facilities – efficient solutions, design and maintenance

Session 4. Informatisation and digitalization

Session 5. The current state of networks in municipal and industry

In 2020, the **EcwaTech WasteTech Award (EWA)** was run for the first time. A unique event with no analogues in Russia for the industry of water and environmental technologies, determined the best of the best in the nominations presented. The aim of the EWA Award is to identify products, services and projects that meet the highest quality criteria and to reward the best enterprises and organisations that work for water supply, waste management sector. The winners of the first ever EWA International Environmental Prize were the companies that have presented the following innovative projects and developments. The ceremony of awarding the first winners of the EWA Award took place on the first day of the Exhibitions.

FEEDBACKS

Alexander Ponomarenko, General Director, Mosvodokanal

(the biggest water management company in Russia)

EcwaTech is the best opportunity to share the results of the great work that is being done in our company and to learn the best technological innovations.

Sergey Krasilnikov, Commercial Director, Voronezh-Aqua LLC

(solutions for water treatment and water purification of industrial and municipal enterprises)

EcwaTech is perhaps the only event in 2020 that brought a lively stream, added impetus to communications. I am sure that the participants will appreciate this event.

Gadji Guseinov, Strategic Development Director, Stowater Company

(water treatment and treatment plants for industrial, storm and waste water)

Our company exhibited at EcwaTech to get acquainted with other players of water sector, to learn new technologies and to provide our partners and competitors with our technologies. You need to participate in such events in order to feel the market and understand market trends.

Irina Smirnova, Head of Marketing, JAFAR RUS

(JAFAR valves and innovative PVC-O pipes TOM)

We very highly appreciate the work at EcwaTech and I want to emphasise that the visitors who came to stand were really targeted, our target clients, and in this I see a big advantage of this event.

Evgeniy Pupyrev, Head of Informational Center of Design

(technical audit of water supply and sewerage systems)

It is definitely a great deal that Reed Exhibitions, despite the difficult pandemic situation, decided to hold this event. For me, as a specialist, communication with people is super important, for me it is a breath of fresh air.
